-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Allowable Subject Matter

1. Claims 2 and 7-18 are allowed.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 21-35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lauterbach US 4,614,674 or JP-11116889.

The rejection set forth under 35 USC 103 in the paper mailed 12/30/05 is deemed proper and is herein repeated.

1. The newly amended claims and the remarks filed in support thereof have been fully considered but have been found not persuasive.
2. Applicants argue that the prior art does not teach removing conventional curing agents and replacing the conventional curing agents with the claimed acrylate curing agents. This is not persuasive.

Response to Arguments

3. In response to applicant's argument that the art fails to recognize the use of the acrylates as curing agents, the fact that applicant has recognized another advantage which would flow naturally from following the suggestion of the prior art cannot be the basis for patentability when the differences would otherwise be obvious. See *Ex parte Obiaya*, 227 USPQ 58, 60 (Bd. Pat. App. & Inter. 1985).

4. In response to applicant's argument that the art fails to recognize the use of the acrylates as curing agents, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim.

5. The use of the acrylate as an adsorbent in JP-'889 is not germane to the patentability of the claimed invention. The art renders obvious the claimed composition.

6. With respect to the USPN '674, one need not equate the claimed acrylate with the flattening agent as argued. The fact that the acrylate compound is used in the system is sufficient to render the claimed composition obvious.

Conclusion
